Assignment T6: Final Demo

Part 1: Demo Date / Time & Description

We demoed the second iteration of our software on December 11, 2020 at 3pm EST. We did experience a challenge with the deployment. There was an unexpected behavior related to the node server proxy over the public internet that degraded the application state after certain behaviors such as refreshing the page. Because of this, we did a two part demonstration, with half being done on the cloud deployment, and the other half remotely on Cherry's desktop to show the correct application behavior.

Part 2: Github link and revision

Github link: <https://github.com/AutumnAudio/AutumnAudio>

We tagged the release used in the demo as "T5".

Part 3: Assignments link
